Food Labeling; Declaration of Ingredients and Food Labeling; Declaration of Ingredients, Common or Usual Name for Nonstandardized Foods, Diluted Juice Beverages

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule; delay of statutory effective date.

SUMMARY: The Food and Drug Administration (FDA) is announcing changes in the statutory effective date of the ingredient labeling provisions of the Nutrition Labeling and Education Act of 1990 (the 1990 amendments). This action is in response to an amendment of section 10(c) of the 1990 amendments. FDA published proposed rules to implement the ingredient labeling provisions on June 21, 1991 and July 2, 1991.

FOR FURTHER INFORMATION CONTACT: Carl L. Giannetta, Center for Food Safety and Applied Nutrition (HFF-JLZ), Food and Drug Administration, 200 C Street, SW., Washington, DC 20204, 202-405-0229.

SUPPLEMENTARY INFORMATION: Section 7 of the 1990 amendments modified section 403(f) of the Federal Food, Drug, and Cosmetic Act (the act) to require the declaration of all ingredients in standardized foods, the declaration of certified color additives in foods, and the declaration, on the information panel, of the percentage of a fruit or vegetable juice in a food purpo ting to be a beverage containing fruit or
vegetable juice. FDA published proposed regulations to implement these requirements in the Federal Register of June 21, 1991 (56 FR 26582) and July 2, 1991 (56 FR 30452), with opportunity for comment through August 5, 1991. Both proposals are part of the Department of Health and Human Services' (DHHS') major initiative to reform the nation's food labeling system and part of DHHS' response to the 1990 amendments.

Although FDA proposed to make the ingredient labeling regulations and percent juice labeling regulations effective on the same date as the mandatory nutrition labeling final rule (i.e., May 8, 1993), the agency pointed out that the 1990 amendments state in section 10(c) that ingredient listing provisions for standardized foods, certified color additives, and percent juice labeling were to take effect 1 year after enactment. Thus, on November 8, 1991, these statutory provisions would be in effect.

In response to the proposals, many comments from the food industry strongly urged FDA to reconsider the effective date for ingredient labeling regulations and percent juice labeling regulations. The comments argued that a November 8, 1991, effective date would not allow the food industry enough time to develop the required labeling and would significantly increase costs because present inventory would have to be discarded. The comments strongly urged FDA to establish a uniform effective date to comply with the effective date for section 403(q) of the act (mandatory nutrition labeling) and section 403(r) of the act claims, which were added by the 1990 amendments. Even though FDA agreed with these comments, it had no authority to provide the requested extensions.

A technical amendment was enacted on August 17, 1991, in which Congress amended the 1990 amendments to delay or modify the effective date of the new ingredient and percent juice labeling requirements. To reflect these changes, the agency is giving notice that a food for which a standard of identity has been established, or with one or more colors required to be certified, that bears a label that was printed before July 1, 1991, and that was attached to the food before May 8, 1993, will not be subject to changes made in section 7(1), which modifies section 403(i) of the act to require that all mandatory as well as optional ingredients in a standardized food be declared, and in section 7(3) of the 1990 amendments, which modify section 403(i) of the act to require the declaration of certified colors. Labels on these foods printed after July 1, 1991 but before the effective date of a final implementing regulation and attached to the food before May 8, 1993, must conform with requirements of the June 21, 1991 proposal. Labels attached to food after May 8, 1993, will be subject to the amended section 403(i) of the act and to FDA's final regulations. Finally, the new ingredient labeling requirements for fruit and vegetable juice beverages will not apply to labels attached to these products before May 8, 1993.

Michael R. Taylor,
Deputy Commissioner for Policy.
